FOREST FIRES—A NEEDLESS WASTE

The primary objective of all fire fighters is PREVENTION—fire stoppage. This is the goal toward which your local forest fire warden and his deputies are constantly working. It can be achieved ONLY if YOU and YOU and YOU cooperate with them. It is worth YOUR effort and can be accomplished by:

1. Being careful with fire in or near woodland, being particularly careful with matches and cigarettes.
2. Securing the required **written permit** from the warden when the ground is not covered with snow.
3. Insisting that others be careful and comply with burning requirements.
4. Calling the warden promptly when fire is detected and aiding him to extinguish it.

Let's reduce the number of forest fires and eliminate our most shameful waste.

EUGENE LORDEN,

Forest Fire Warden.

SUPERINTENDENT'S REPORT

Your Children

Professional educators are in the "doghouse," professional politicians are in "the driver's seat," and your children are "out on a limb" as a result of the battle of frustration and finance in the shadow of Daniel Webster's statue in Concord. It almost seems as though anyone connected with education in the State of New Hampshire belongs to an "unholy alliance" as a result of which anything they desire is foredoomed to failure. Let's look at this thing from a little greater distance and thus hope to sharpen our perspective.

The children in our schools are your children and their problems are yours and no one can truthfully say otherwise. Educators are hired to provide the best possible educational facilities with the money available, and should we be blamed for desiring better things for the children we now have and know we will have in the years to come? We would be negligent in our duties were we to desire less and yet some measure of obtaining better education for your children must be seen to make the job at hand more soul satisfying than can be obtained by receiving a paycheck. People in Canaan get excited over details but are coldly indifferent to broad, basic, and overall programs of organization. This ought not to be.

Let's look at some facts! The rated capacity of Canaan's schools is 225 pupils and present enrollments total 278. When broken down by rooms this picture is still worse. Mrs. Carlson's room should not have over 28 pupils and actually has 40; Mrs. Gammons has 35 against a capacity of 20, and the West Canaan schools have 55 against 36. The lack of proper sanitary facilities is too well known to more than mention here and the same can be said of the playground space at the village. The census reports indicate grades of at least 27 for an

average for the next two or three years with 35 a likely number when those babies born within the last year finally get to school. This will give us an elementary enrollment from 240 to 270 or more in space rated at 150. No amount of grade juggling or combinations is going to change this basic fact. What do you think of your chances of offering a satisfactory education to your children with present conditions and present budgets? Do you need state support of education? Do your children deserve state support of education? Can we educate your children for the world in which they must live without state support? Can we avoid federal support for education of your children and still spend billions for foreign aid? Isn't it time we put proper values on our greatest assets, your children, and yes, children wherever they live in New Hampshire and the United States? Canaan children should now enjoy the opportunities for education which can come only from a single grade per teacher with not over 30 to a grade and preferably 25. We qualify only in the numbers of pupils we now have.

What can be done in Canaan about these problems? Nothing of any value? The issue can not be avoided and some things will have to be done due to the simple pressure of numbers of pupils. What? I am going to make a few unpopular suggestions.

1. Secure an option on an elementary school site of several acres, 5 and more if possible.
2. Vote to apply for federal funds for school house planning. Funds are available as loans without interest and not payable unless actual construction takes place. (First come first served.) Vote necessary.
3. Have designed an elementary building expandable to meet eventual needs.
4. Build what you must have to keep pupils under

cover. One room would help, two would be better, 6 would be fine, and 8 is what we need!

5. Work your heart out for increased state support of education in any form you can get it. Don't be too fussy over details unless they mean no aid at all. General aid can be used by the tens of thousands in Canaan, building aid by the same amounts.
6. Approach the members of the legislature and other political powers in the front of things and those behind the scenes. You don't need to high pressure them. An honest statement of your problems, school, financial and otherwise will get the best results. The problems are here, they're real and not imaginary. There is no need to fake anything or to exaggerate. Sincere individual letters will help and large attendances at committee hearings are effective. This means personal sacrifices in time and money but you will be doing it for your own children.
7. If you don't agree with any of the above things come forward with better ones.
8. If you don't want state support vote the money out of the property tax!
9. As more pupils attend school more money must be spent!
10. I believe that most of you want for your children what I want for them when taken from an over all view. Let's do something about it, and remember we need a lot of help and more than we have the right to expect the Canaan property owner to finance.

These problems are not new; they are well known but not admitted out loud; we have actually moved backward in the past year. How much longer can we avoid constructive action on a sound basic philosophy of edu-

cation? It doesn't take many years for a school generation to come and go. Your children are in school now or will be, and for a period of years. Shouldn't they enjoy in school advantages comparable to the many modern conveniences found in modern homes? Are they not entitled to advantages and services comparable to well ploughed and salted roads? New Hampshire prides herself, and justly so, on her winter maintenance program and is well known nationally for the same. Is New Hampshire equally well known for the superlative qualities of her public educational services and program? National publicity on an austerity program seems to be the answer to this one!

Respectfully submitted,

C. MAURICE GRAY
